## Rejecting the Application: During Verification

There are 2 reasons why you may have to reject an application during verification, fall into two categories:

### Personal Details Incorrect

If there are any **mistakes** in the applicants **personal details** e.g. name, date of birth, and or address details, the application should be **rejected**.

### Insufficient/Incorrect ID

ID should **not** be accepted at verification if it **does not correspond** with the applicants **personal details**, i.e. the ID is in their previous name or address **and/or** out of date.

It is very important to be thorough when verifying an applicants ID.

If mistakes are found, then this can lead to it being rejected at countersign and cause delays in the application being processed.

If the disclosure check is carried out with incorrect personal details, this makes the result of the check unreliable.

Being vigilant and spotting any potential errors or discrepancies at Verification allows the disclosure checking process to run as smoothly as possible.
